INSTITUTE

About Kawungpitu

Kawungpitu is a non-profit organization that aims to realize **sustainable livelihoods** based on three pillars: **wise resource management, strengthening community capabilities, and increasing community resilience amid the climate crisis.**

Kawungpitu was established on **March 15, 2024** in **Bogor**, by a group of young people who have come a long way in community organizing and developing.

Kawungpitu's vision is to:

Realize sustainable
livelihoods based on
local wisdom and
potential resources

To realize sustainable livelihoods, **Kawungpitu** has three missions, which are:

1. Encouraging community access and control over productive resources in a participatory way

2. Improving community capability in managing productive resources through critical pedagogy

3. Increase community resilience to shocks and stresses

The strategies used by **Kawungpitu** to reach the goals:

**Community
Organizing**

**Community
Development**

**Capacity
Building**

**Participatory
Research**

Advocacy

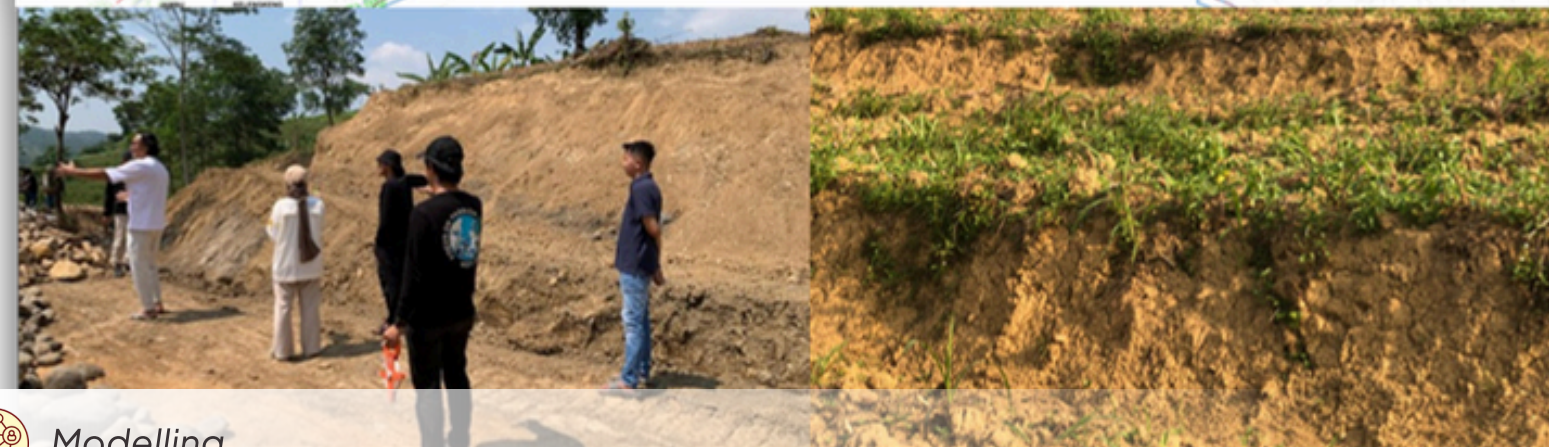

Modelling

THE PROGRAMS

Integrated Farming Development Project

2024

 Modelling

This project is to design a model of integrated farming in a landscape. It's designed to make farms more efficient, less dependent on external inputs, and improve environmental and economic sustainability.

Socio-Cultural Participatory Research

2024

 Participatory Research

Cibuluh, as a village that still holds local knowledge, is a place that is so interesting to be examined. As a youth group that has a special interest in community development, Kawungpitu has a commitment to develop the potential in Cibuluh

THE PROGRAMS

Socio-Economic Baseline Research

2024

 Participatory Research

This study aims to explore the potential and needs of the coastal community. This study is expected to support and compile interventions for the conservation of mangrove ecosystems while making a real contribution to improving the welfare of coastal communities

Scaling Up Anambas Rural-smallholder

2024-2026

This program is designed to create an increase in the welfare of coastal communities by optimizing the management of mangrove ecosystems in a sustainable way

THE PROGRAMS

Training to be a Program Facilitator

2024

#LingkarBelajarKawung (LBK)

All the time

This training was held to present program facilitators with various knowledge and approaches that can be used to ensure the program runs well in the field

It's a dialectical space that aims to discuss ideas in the realm of community livelihood in academic and practical niches. This discussion series was born from ideas and determination to encourage sustainable livelihoods for marginalized people
